

GAME-CHANGER: EXPLORING NON-LINEAR PEDAGOGY IN TENNIS COACHING

(on-court)

Summary

Experience a paradigm shift in tennis coaching as we delve into the principles of non-linear pedagogy and its transformative impact on player development. Discover how this dynamic approach challenges traditional teaching methods by prioritizing creativity, exploration, and adaptive problem-solving. Through an interactive session and practical demonstrations, learn how to harness the power of non-linear pedagogy to unlock your players' full potential and cultivate a love for the game that lasts a lifetime.

Index

1. Introduction
2. Goals of the session
3. Historical perspective
 - a. Early teaching and training methods
 - b. Sports science influence in further developments
